PROFESSIONAL SUMMARY

Software Project Manager with 6+ years of experience leading end-to-end software delivery across web, mobile, and cloud platforms. Skilled in Agile/Scrum execution, cross-functional team leadership, and requirement-to-release ownership for AI, IoT, and product-driven engineering initiatives. Currently leads a 12-member team across 2 concurrent projects. Combines technical fluency with disciplined delivery practices to keep scope, risk, and stakeholder expectations aligned from planning through launch.

CORE COMPETENCIES

- Agile / Scrum & Sprint Management
- Roadmap & Delivery Planning
- Risk & Dependency Management
- Cross-Functional Team Leadership
- Resource & Capacity Planning
- Product Development & Discovery
- Requirement & Scope Management
- Jira & Project Tracking
- Stakeholder & Client Communication

AI-ENABLED PROJECT MANAGEMENT

Uses AI tools (ChatGPT, Claude, Gemini) as productivity and decision-support aids alongside PM judgment — not as a substitute for it:

- Requirement analysis & user-story drafting
- Status report & stakeholder updates
- Test-case & QA documentation drafting
- Client email & communication drafting
- Data analysis for delivery decisions
- Meeting notes & action-item extraction
- Risk & dependency identification support
- Technical research & documentation
- Sprint planning & backlog refinement
- Workflow automation for routine PM tasks

PROFESSIONAL EXPERIENCE

Engineering Manager • Utah Tech Labs
